	Encapsulation Example	
	package complex_numbers is	
	type complex is private; constant i : complex;	
	function re (C : complex) return real; function im (C : complex) return real; function "abs" (C : complex) return real; function arg (C : complex) return real;	
	function "+" (L, R : complex) return complex;	
	function "" (L, R : complex) return complex;	
	private	
	type complex is record re, im : real; end record complex;	
	end package complex_numbers;	
June 1997	Ashenden & Wilsey — SUAVE	8

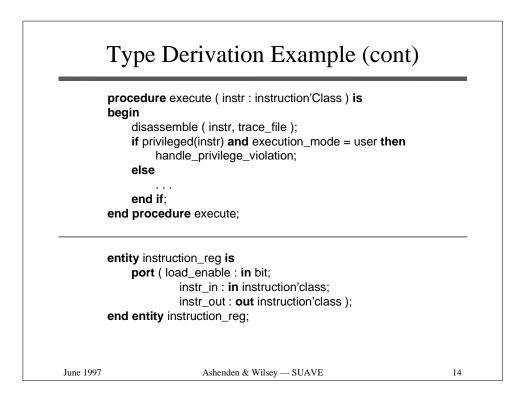

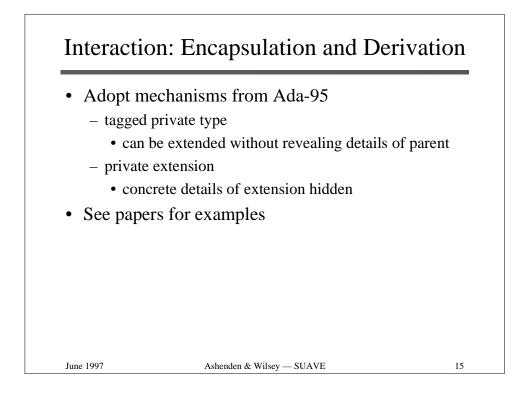

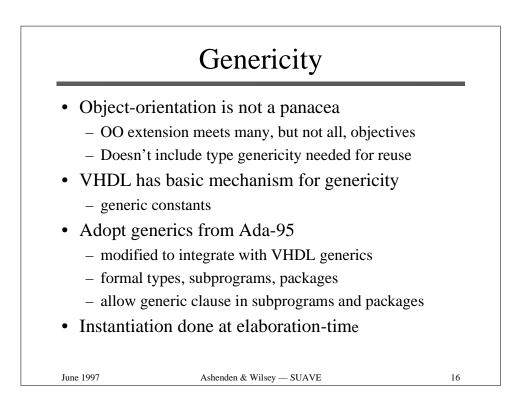

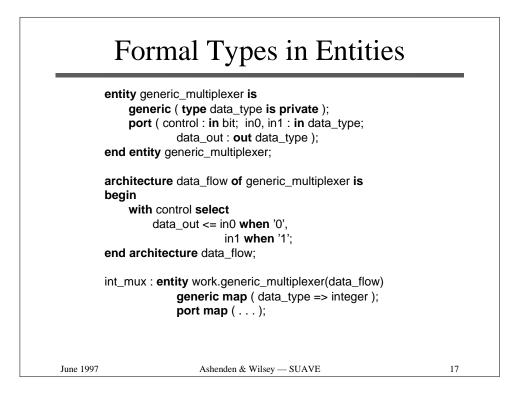

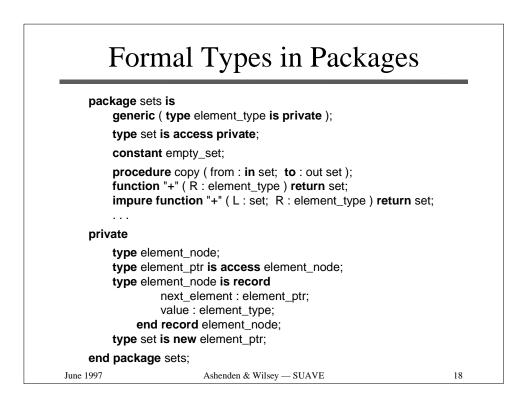

Туре	e Derivation Example (co	ont)
base : re offset : in	ruction is abstract new instruction with reco gister_number; teger; nemory_instruction;	ord
function effective	_address_of (instr : memory_instruction) ret	urn natural;
procedure perform	m_memory_transfer (instr : memory_instructi	on) is abstract
destinatio	ion is new memory_instruction with record on : reg_number; pad_instruction;	
procedure perform	m_memory_transfer (instr : load_instruction)	;
source : I	tion is new memory_instruction with record reg_number; tore_instruction;	
procedure perform	m_memory_transfer (instr : store_instruction);
June 1997	Ashenden & Wilsey — SUAVE	13

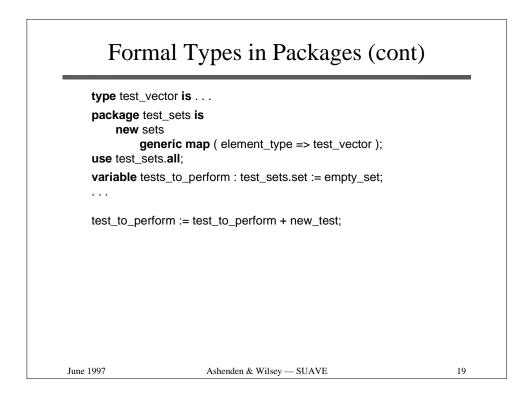

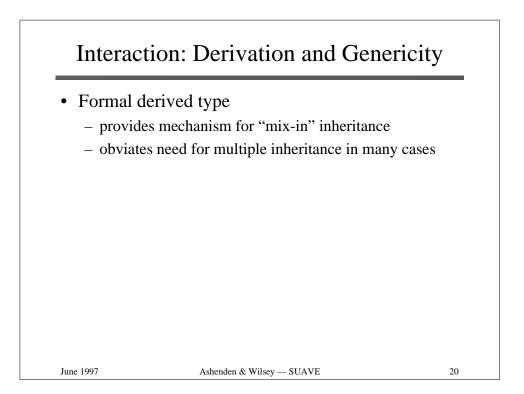

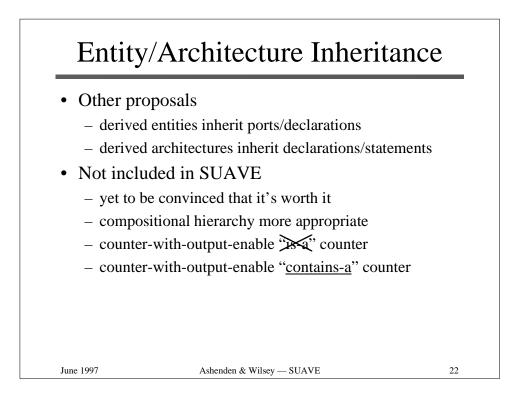

nackage index	ed_addressing_mixin is	
	type parent_instruction is abstract new instruction with private);	
ir	<pre>ked_instruction is new instruction with record ndex_base, index_offset : register_number; ecord indexed_instruction;</pre>	
function e	effective_address (instr : indexed_instruction)) return address
end package i	ndexed_addressing_mixin;	
destin	ruction is abstract new instruction with recor ation : register_number; d load_instruction;	d
	red_loads	on);
alias indexed_	load_instruction is indexed_loads.indexed_ins	struction;
June 1997	Ashenden & Wilsey — SUAVE	21

Concurrency and Communication

- Other proposals
 - add procedural operations to entity interface
 - view entity as class of active objects
 - implies monitor-based semantics
 - concurrency-control approach
- Not included in SUAVE
 - true message-passing approach more appropriate
 - used by other system-level modeling languages
 - fits in better with VHDL concepts
 - future work
